16th Annual Meeting of the American Ecological Engineering Society

"Rooftop to Rivers: Integrating Built and Natural Ecosystems"

Knoxville, TN | June 7-9, 2016 | Downtown Hilton

aees2016.utk.edu

Ecological Engineering is "those cases where the energy supplied by man is small relative to the natural sources but sufficient to produce large effects in the resulting patterns and processes." – *H.T. Odum, 1962*
